

EXPERIENCE

TwinnieLagos (Remote)

Backend Developer / Backend Team Member[Add start date] – Present

- Built and integrated WhatsApp Business API functionality, including webhook handling, Phone Number ID, and WABA (WhatsApp Business Account) integration
- Implemented authentication and access token management to support secure messaging automation
- Developed backend infrastructure and API integrations connecting WhatsApp business and catalog features to core systems
- Collaborated with the backend team on platform reliability and feature delivery for a live startup product

Sovereign Technology LimitedLagos

*Backend Developer*April 2025 – February 2026

- Developed and maintained backend services using Node.js and Express
- Implemented secure authentication and authorization systems
- Designed and integrated APIs with frontend and third-party services
- Ensured data accuracy, validation, and consistency across systems
- Debugged and reviewed code to identify and resolve errors

OutlierRemote

*AI Data Annotator*2026 – Present

- Evaluated AI-generated responses for factual accuracy and consistency
- Followed detailed annotation guidelines to label and review datasets
- Identified errors and improved output quality across tasks
- Maintained high accuracy rates while meeting deadlines
- Adapted quickly to evolving project requirements and QA standards

PROJECTS

CampusTrade API

Marketplace backend — Node.js, Express, MySQL, Sequelize

- Built authentication, JWT-based sessions, email verification, and password reset flows
- Designed a seller dashboard and documented endpoints with Swagger

Escrow Service

Backend for secure, condition-based transactions

- Implemented transaction creation, buyer/seller flows, and fund holding/release logic
- Built transaction status management, dispute handling, and audit trails
- Added webhooks and authentication/authorization for secure payment processing

BookStore API

Book management backend — REST API

- Designed a RESTful API with full Swagger/OpenAPI 3.0 documentation

Pomodoro Tracker API

Productivity tracking backend — Node.js, Express

- Built session tracking with CSV export functionality

VOLUNTEERING

Umbrella for the African Child (U.T.A.C)Lagos

Volunteer

- Supported a community outreach programme in Makoko, one of Lagos's underserved communities, focused on educational and community-based initiatives
- Collaborated with fellow volunteers across multiple underserved communities to expand access to opportunity and resources
- Contributed to ongoing efforts to create positive, lasting social change through community service

SKILLS

Programming & Frameworks: JavaScript, Node.js, Express.js

Databases: MongoDB, MySQL

Version Control: Git & GitHub

API Development: RESTful APIs, Authentication, Swagger/OpenAPI

AI & Data: Data Annotation, Prompt Evaluation, Data Labeling, Quality Assurance

Other: Attention to Detail, Problem-solving, Debugging, Collaboration
